TITAN 8 steam cleaner

Is the first option. Distilled water is loaded directly into the boiler.

Professional use

REF. 100202

836 €

TITAN AUTOFILL steam cleaner

It also has a pump to suck distilled water from an external bottle.

REF. 100203

969 €

External bottle not included.

- ✓ Made of stainless steel with high quality components.
- ✓ Digital pressure switch.
- ✓ Full and lack of water indicator.
- ✓ Connection cable with built-in differential switch.
- ✓ Drain tap with safety lock.

Specifications: 100202 and 100203

Dimensions 360 x 270 x 420 mm

Weight 12,5 kg	Power 2200 W	Voltage 220 V, 50/60 Hz
Pressure 8 bar	Boiler 3 L	

TITAN PLUS steam cleaner

Also has an internal tank for distilled water storage.

You can load water into this extra tank without having to turn off the machine and wait for the pressure inside the boiler drops. Simply open the auxiliary tank cap and pour more water when you need it.

Safer and without interruptions.

Professional use

Specifications: 100204

Dimensions: 380 x 370 x 450 mm

Weight 18 kg	Power 2600 W	Voltage 220 V, 50/60 Hz
Pressure 4 - 8 bar	Boiler 3 L	Auxiliary tank 2 L

REF. 100204

1.396 €

Additional Information: 100202, 100203, 100204

They are supplied with the following accessories:

- ✓ Power cord with built-in protection.
- ✓ Fine and long replacement nozzle.
- ✓ Replacement safety cap and 2 gaskets.
- ✓ Funnel and measuring cup (300 ml).

In models with direct connection to the water intake:

- ✓ Necessary hoses for water inlet/outlet connection.
- ✓ With drain for cleaning the tank with citric acid (see instructions).

Citric acid

REF. 100210-01

Ref. 100202

- ✓ Manual filling.

Ref. 100203

- ✓ Manual filling.
- ✓ Autofill without having to the plug to be released (**external bottle**).

Ref. 100204

- ✓ Manual filling.
- ✓ Autofill without previous cooling (**integrated tank**).
- ✓ Direct water net connection.

MESTRA

Pressure former PlastPress

The most compact positive pressure machine on the market.

Greater accuracy in the forming process and lower noise compared to vacuum machines.

Practical and versatile, it accepts round and square sheets up to 6 mm thickness.

It must be connected directly to a compressor (between 3 and 8 bar).

Sheets \square from 125 to 131 mm
Sheets \circ from 120 to 134 mm

NEW

REF. 080544

941 €

Specifications

Height 270 mm
Width 235 mm
Depth 265 mm
Weight 7.5 kg
Power 450 W

Vacuum forming machine

Thermoforming machine for square and round sheets.

Sheets \square from 125 to 134 mm
Sheets \circ from 125 to 134 mm
(adapter available for \circ 120, not included)

REF. 080542

651 €

Specifications

Height 310 mm
Width 275 mm
Depth 260 mm
Weight 4.6 kg
Power 925W

NEW

Thermoforming sheets

Double packaging (inside-outside).
For all types of use.

CE Medical device

Thermoforming sheets

CE Medical device

NEW

Standard square and round thermoforming sheets.
Made of high quality plastic with CE marking certification as medical device.

There is no soot, nor fumes during the heating.
As they do not contain recycled materials, they do not tear while subjected to vacuum.

Available in a wide variety of thicknesses and types.
Supplied in metalized package and vacuum closed.

Drying oven for thermoforming sheets

A fan circulates the hot air producing a uniform drying:

- ✓ Draws out moisture and keeps dry thermoforming sheets, to avoid the formation of bubbles.
- ✓ Drying of instruments plaster models, etc.
- ✓ 6 stainless steel trays.
- ✓ Stainless steel housing.
- ✓ 24 hour timer.

REF. 080118

268 €

Specifications

Height 310 mm • Width 340 mm • Depth 450 mm
Weight 8.3 kg • Power 550-650 W • Temperature 35-75 °C

Anodizing unit

The anodizing unit for titanium is a simple device that allows you to process titanium dental elements quickly, easily and economically. The results are comparable to products belonging to a much higher category.

- ✓ Corrosion resistance.
- ✓ Wear resistance.
- ✓ Better adhesion and surface finish.
- ✓ Less release of metal ions.
- ✓ It works with a solution of water and sodium bicarbonate.

Solution of water (600 ml) and sodium bicarbonate (20 g)

Specifications

Dimension: 207 x 245 x 160 mm • Weight: 2,73 kg
Voltage: 10~80 V • Power supply: AC220~240 V, 50/60 Hz
Power: 100 W • Anodizing time: 5 seconds

Appearance:

The anodic layer can be colored with different shades. This advantage is especially interesting when the anodised element serves as a support for a translucent material such as zirconium or for bars on implants.

Depending on the voltage, different shades will be obtained. For example, at 60 V you get an attractive golden shade and at 75 V you get a pink shade, highly appreciated in the dental sector. The colouring process takes only 5 seconds.

REF. 100295

598 €

Video explanation

Microwave oven for zirconia

Microwave sintering furnace for zirconia prostheses.

- ✓ Total sintering time of only 4 hours.
- ✓ The zirconia is not heated from the outside to the inside (conventional furnace), but is uniform throughout the mass, which avoids possible breakage and/or deformation.
- ✓ Maintenance savings (less power, without expensive resistances of molybdenum silicate).
- ✓ Very low consumption (800/1100 W).
- ✓ Allows several production cycles on the same day.
- ✓ Intuitive and easy to program display.
- ✓ The housing practically does not get hot.

The oven is supplied with all necessary accessories for immediate start-up.

Specifications

Dimensions: 547 x 440 x 385 mm • Weight: 31 kg
Voltage: AC 230 V, 50 Hz • Power: 2000 W
Max. temp. 1550 °C

Magic Eye scanner

MagicEye is a scanner especially designed for use within the industry dental.

Its powerful and intuitive software incorporates a modern and extensive set of commands, as well as being fully compatible and integrable with 3D dental design applications, which gives it great versatility.

- ✓ Operating system: Win 10, 64 bit
- ✓ CPU: INTEL i5 - 9400H
- ✓ DDR: DDR4 2666 8 GB
- ✓ HDD: 2TB 256 MB 7200 Rpm
- ✓ Graphic card: GEFORCE GTX 1050 Ti
- ✓ Port: USB 3.0

Specifications

Precision: <10 µm
Speed: 6 sec. bite scan
9 sec. lower/upper jaw scan
Weight: 5 kg • Camera resolution: 2 x 1,3 MP
Power supply: 230 V 24 VDC
Output format: STL • Light source: Azul
Blue light projector with DLP® technology

Brushes

Hybrid Kolinsky-Toray

Made in Spain

It is known that the excellence of a brush is given by four basic attributes: its ability to recover its initial shape after use (recovery), its ability to absorb liquids (capillarity), the ability to release that liquid progressively (dosing), and finally, its ability to slide with very little resistance (slip).

Due to its condition as a natural fibre, **Kolinsky** sable hair has a scaly structure. On the other hand, **Toray** has a smooth structure with holes, so both fibres have advantages and disadvantages. However, if they are combined in the right proportion, a perfect balance between recovery, capillarity, dosing and sliding can be achieved.

This is what our new range of **HYBRID** brushes offers.

- ✓ **Advantages from Kolinsky hair:**
Excellent liquid retention and subsequent dosing of the same.
- ✓ **Advantages from Toray fiber:**
Excellent ability to recover its shape after use, excellent abrasion resistance, extraordinary glide with hardly any resistance.
- ✓ **Other advantages:**
Ergonomic handle, variety of sizes, very competitive price.

	Reference	Material	Characteristics	PRICE

Sandblaster Eclipse II, Eclipse II-T and Automatic

Sandblasting machines made of high resistance ABS.

Eclipse II: Classic 2-tank sandblasting machine specialized in microblasting.

Eclipse II T: Similar to the previous one, but with a fixed gun, as well as a large capacity hopper.

Eclipse Automatic: The skeletons are deposited in a basket that rotates by the action of the motor. The blowing nozzle is adjustable in three dimensions of space. The basket is disassembled easily for the preparation of work, and has a large capacity hopper.

- ✓ Work pressure 2 to 5 bar.
- ✓ LED light

Suction unit Sirocco M and L

These are two robust, quiet and highly reliable suction units, the M model being particularly practical for use under the workbench and the larger capacity L model.

Its brushless motor extends its service life by five to ten times compared to traditional models.

They incorporate a connection for an external micromotor and a milling machine that will operate synchronously with the suction unit. In addition, its ergonomic design with handles and wheels facilitates its use and mobility in the clinic and laboratory.

- ✓ Extensive set of fully compatible accessories.
- ✓ Exceptionally quiet operation.
- ✓ Easy to use and change filter.
- ✓ Filtration grade ULPA U15 (optional).

Suction unit Eolo Induction

Its new "brushless" induction motor extends its useful life between 5 and 10 times compared to traditional models, and has an innovative double filter system optimized for work in the dental laboratory (including abrasives such as aluminum oxide). It can be mounted with HEPA filter.

It easily adapts to the laboratory furniture, filling a minimum space. In addition, the ergonomic design facilitates its use and mobility. The electronic control with LCD screen is equipped with protection systems against overloads or obstructions in the suction mouth and with a visual indicator of the filter filling level and the detection of the micromotors.

It allows manual or automatic operation synchronized with up to 3 different devices (sandblasters, micromotors, etc.). The detection and adjustment of micromotors is carried out by the electronic control itself, which allows detecting any micromotor, including those of the "brushless" type.

The Vulcano family of furnaces has been developed as an economical alternative to MESTRA's standard ovens.

The only difference between a Vulcano oven and its equivalent in the standard range is in the electronic control, keeping the rest of the components and functions.

Its LCD screen provides all the information necessary for programming and job monitoring.

MODEL	HP25	HP 50	HP 100
Height	465 mm	500 mm	525 mm
Width	335 mm	375 mm	440 mm

Iris Vacuum mixers

Economical and useful vacuum mixer. Just place the bowl and press the operation key and the mixer will start up. In a few seconds the mixture will be ready.

As there are four versions available, you will find the model that best suits your needs. Despite the differences in their control system, all the versions share the same motor-pump-chassis structure of well known solidity and reliability.

Optional support

The IRIS vacuum mixer has been designed to be hung on the wall. However, whenever it is no possible, there is an optional support available.

The UV device emits constant, concentrated and uniform ultraviolet light, to quickly cure prints made with photopolymer resins.

The subsequent curing process increases the hardness and strength of the printed products.

Resin mixer Agitation device of resin bottles

Double movement, rolling and swing, so the mixing action is smooth and highly efficient. The characteristics of the resin are not altered due to an excessively energetic movement.

A homogeneously mixed resin is indispensable to get an excellent print job. The machine is silent and has a speed regulator.

Semiadjustable arcon type articulator Arquimedes Professional A7 Plus

REF. 010099

200 €

Robust structure made of aluminum, ensuring greater stability.

Design that provides greater visibility.

- ✓ Semiadjustable / Arcon.
- ✓ Fixed intercondylar distance (110 mm).
- ✓ Curve condylar guide.
- ✓ Regulable condylar guide.
- ✓ Regulable Bennet angle.
- ✓ Central lock.
- ✓ Stabilization system of the condilar guide movement with silicone connection.
- ✓ Support for upper branch in open position.

Standard face bow

REF. 010102-50

95 €

The standard face bow is an apparatus used to record the spatial position of the patient's upper dental arch in relation to the skull and transfer the record to the articulator.

Transfer of the patient record is performed by setting the complete face bow in the upper frame of the articulator.

MESTRA
by bioart

CE Medical device

Elite face bow

REF. 010100-55

198 €

The new elite face bow brings an articulated and fixation system for the fork that allows a faster registration process for the professional and comfortable for the patient.

It has a jig transfer assembly that eliminates the needs for face bow in the assembling process of the casts in the articulator, turning the process faster, more practical and stable.

Its nazium relator with adjustable height, including an infra-orbital indicator, turns the registration process more precise.

Is equipped with a sliding system which allows smooth lateral movement (opening/closing) and facilitates the overall use.

The ear pieces are anatomical, removable and chemically sterilized.

Tables for one and two workstations

Very high quality work tables with all the elements and accessories for work in dental environments: plugs, shelf/shelf, drawers, stainless steel work tablecloth-dolly, air blower, etc. They also come with a pre-installation for a gas burner. They also incorporate a practical chipper that fits perfectly with the Orión work box (Ref. 080214 from MESTRA), forming a compact and fully integrated set.

The dimensions and geometries allow the easy incorporation of other MESTRA products (Eolo Aspiration, micromotors, curing lights, etc.), creating an ergonomic and highly productive work environment. Assembly is simple.

Lamp for zirconia drying

The zirconia drying lamp is an infrared lamp with thermal radiation. It is used to dry the zirconia structures after immersion in the coloring liquid, to avoid corrosion of the sintering furnace resistances due to the acid contained in the liquid.

The drying time of the frameworks depends on the type of framework. Made of aluminum.

REF. 100030

143 €

Spray for laboratory scanner

Indispensable to achieve an optimal scan, increasing the resolution of the areas with the worst reading in a model.

Color and texture have been formulated to be very sharp at the lighting frequencies commonly used by dental scanner projectors.

Drying times are extremely fast, which improves productivity.

Debris sprayed on unwanted surfaces can be easily cleaned.

The package contains 200 ml.

Dry piston compressors

CCERTIFICATE BY TÜV SÜD
TYPE CERTIFICATE
N° 12202200491258001
Directive 2014/29/UE
(Pressure vessels)

Family of compressors consisting of two sizes of 80 and 160 litres/minute to which a dryer with automatic drain can be coupled. Extremely quiet operation (60 dB), easy maintenance (dry piston) and excellent reliability.

They are supplied with two pressure gauges (boiler and service pressure), outlet pressure regulator and complete set of valves for draining. The service pressure can reach 8 bars.
